SUMMARY

Computer Science & Business Systems undergraduate skilled in Python, FastAPI, Django, React and PostgreSQL, with hands-on experience building backend and full-stack systems, REST APIs, event-driven applications and machine learning pipelines through a live production platform, engineering projects and an ML/AI internship.

EDUCATION

P.E.S. College of Engineering, Mandya - B.E., Computer Science & Business Systems | CGPA: 7.71 *Sept 2023 - Expected 2027*

Coursework: Data Mining, Artificial Intelligence, Machine Learning, Natural Language Processing, Generative AI, Big Data, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages:	Python, C++, C, SQL, Rust
Frontend & Desktop:	React, Next.js, TypeScript, HTML, CSS, Bootstrap, Tailwind CSS, Tauri
Backend:	Django, FastAPI, Node.js, Express.js, JWT, Celery
Databases & Caching:	PostgreSQL, MySQL, MongoDB, SQLite, Redis, pgvector, Neo4j
Machine Learning:	Scikit-learn, Pandas, NumPy
DevOps, Testing & Tools:	Git, GitHub, Docker, GitHub Actions, pytest, mypy, Postman, Render, Netlify
APIs & Integrations:	REST APIs, Razorpay, PayPal, Google OAuth, Google Drive API, Cloudinary, Gemini API

PROJECTS

Snapmeet - Event Management SaaS Platform *2024 - Present*

snapmeet.co.in

Django • Python • PostgreSQL • Redis • Celery • REST APIs

- Built and deployed a full-stack event management platform using Django and PostgreSQL with secure authentication, role-based access control, REST APIs and Redis-backed services, supporting 800+ registered users.
- Implemented Celery/Redis asynchronous workflows for email automation and QR-based attendance, integrating Razorpay, PayPal, Google OAuth, Google Drive API, Cloudinary and Gemini API.
- Optimized backend performance using Redis caching, PostgreSQL query optimization and API rate limiting; validated the system across 23 live events and 1,542 registrations.

Kairo - AI-Powered Engineering Work Continuity & Temporal Knowledge Engine *2026 - Present*

github.com/adi-tya10/kairo

Python • FastAPI • Next.js • React • TypeScript • Tauri • Rust • PostgreSQL • pgvector • Neo4j • Redis • Celery • Docker

- Developed an event-driven engineering continuity platform using FastAPI, Celery and Redis to ingest and normalize GitHub, Jira, GitLab, Linear and Slack events for developer handoff tracking.
- Designed a dual-store knowledge architecture using PostgreSQL, pgvector and Neo4j to connect developers, tasks, pull requests and technical decisions while detecting cross-system workflow anomalies.
- Built a native Tauri/Rust developer HUD with local Git tracking and Win32 hooks, implementing JWT/RBAC, HMAC webhook verification and GitHub Actions CI/CD workflows.

PRISM - Predictive Root-Cause Intelligence for Strategic Metrics *2025*

github.com/adi-tya10/Prism

React • FastAPI • Python • SQLAlchemy • SQLite • Scikit-learn

- Developed a FastAPI-based business intelligence platform automating schema mapping, data cleaning and feature engineering across heterogeneous business datasets.
- Built an automated ML pipeline using Scikit-learn, Pandas and NumPy with dynamic preprocessing, feature selection and semantic schema matching for root-cause analysis and business forecasting.
- Implemented secure REST APIs with JWT authentication and SQLAlchemy ORM, using caching for large-dataset analytics.

EXPERIENCE

Employability.life - ML/AI Engineer Intern *2025 | 6 Weeks*

- Developed ML pipelines for OncoPredict AI's cancer-risk prediction model using Python and Scikit-learn, implementing preprocessing, feature engineering, model training, hyperparameter tuning and cross-validation while collaborating with the team in Agile development and code reviews.

ASCEND, P.E.S. College of Engineering - Vice President *Sept 2024 - Present*

- Led cross-functional teams to coordinate technical initiatives, workshops and college activities, collaborating with faculty and external stakeholders to plan and execute initiatives effectively.

PUBLICATIONS

Co-authored and published "Snapmeet: EventTech Framework for Automating Multi-Stage Event Management" in the Grenze International Journal of Engineering and Technology (GIJET), Vol. 12, Issue 2, June 2026, pp. 5681-5688; presented the research at AITC 2026.
